Front End Software Developer

Description

We are a fast-growing energy consulting and compliance firm, helping commercial and multifamily buildings in New York City meet the stringent requirements of Local Laws 84, 87, 88, and 97. Our software platform automates sub-metering data collection, compliance tracking, and report generation. We are expanding our digital product team and seeking a skilled **Front-End Developer** to help bring our energy tools to life.

Responsibilities

- Collaborate with our back-end engineers and energy analysts to design intuitive user interfaces
- Build and maintain modern, responsive dashboards for sub-metering data visualization, compliance status, and report generation
- Translate UI/UX designs into clean, maintainable code using modern frameworks (React, Vue, or similar)
- Integrate with APIs and display energy performance and compliance analytics in real-time
- Ensure application performance, scalability, and security on desktop and mobile platforms
- Participate in sprint planning and work in a fast-paced, agile environment

Qualifications

Preferred Tech Stack:

- **Languages:** JavaScript/TypeScript, HTML5, CSS3
- **Frameworks:** React, Next.js, Tailwind CSS (preferred) or Vue.js
- **Tools:** Git, Figma, REST APIs, Chart.js or D3.js for data visualization
- **Bonus:** Experience with Firebase, Node.js, or Python-based APIs

Qualifications:

- 2–5 years of experience in front-end development
- Strong portfolio of dashboard or data-centric UI/UX projects
- Fluent in English and comfortable communicating with U.S.-based teams
